COMMUNICATIONS AUTHORITY OF KENYA

NATIONAL COMPUTER AND CYBERCRIME COORDINATION COMMITTEE
A SECURE CYBERSPACE FOR KENYA AND ITS PEOPLE

PROJECT SCOPING FORM

To ensure precision during the security audit of the Jasiri Lending Software, please explicitly define the target environments and architectures by ticking the applicable boxes.

1. Target Environment & Hosting

- [ ] Hyperscale Cloud (AWS, Azure, GCP)
- [ ] PaaS / Managed (Render, Vercel, Heroku)
- [ ] Dedicated / On-Premise Data Center
- [ ] Hybrid / Other Configurations

2. Database & Data Storage Architecture

- [ ] Managed Relational (RDS, Neon, PlanetScale)
- [ ] Managed NoSQL (MongoDB Atlas, DynamoDB)
- [ ] Backend-as-a-Service (Supabase, Firebase)
- [ ] Self-Hosted Database Servers

3. Application Interface Scope

- [ ] Web Application Frontend (UI)
- [ ] REST API / Microservices
- [ ] GraphQL Gateway
- [ ] Mobile Application Backend

4. Tenant Isolation Strategy

- [ ] Single-Tenant (Isolated Deployments)
- [ ] Multi-Tenant (Shared Logical Database)
- [ ] B2B Enterprise (Strict Data Partitioning)
- [ ] Internal Corporate / Operations Use Only

5. Edge Security & WAF Ruleset

- [ ] Global CDN WAF (Cloudflare, Akamai)
- [ ] Cloud Native WAF (AWS Shield, Azure WAF)
- [ ] Network Appliance (F5, Imperva)
- [ ] None / Direct Connection

6. Network Accessibility Restrictions

- [ ] Fully Public (Internet Facing)
- [ ] Geo-Blocked / Regional Only
- [ ] Explicit IP Allowlisting Required
- [ ] Client VPN / Zero Trust Bound

7. Explicit Primary Target URLs

Notice: Please sign and return this completed questionnaire alongside the trailing scope-of-work confirmation to authorize the commencement of phase-one vulnerability probing.

Project: Jasiri Lending Software

Comprehensive penetration test targeting the core application infrastructure, API boundary, and financial authorization logic within the Jasiri ecosystem.

SCOPE OF WORK	HOURS	RATE (KES)	
SQL Injection Vulnerability Assessment Targeted injection attacks and database query tampering analysis against core authentication and ledger data storage architectures.	-	15,000	15,000
DDoS Resilience & Load Testing Simulated Denial of Service (DDoS) bandwidth testing to identify throttling weaknesses and confirm WAF configuration efficiency under pressure.	-	15,000	15,000
API Boundary & Exploit Auditing Manual manipulation of headless endpoints (REST/GraphQL) identifying BOLA/IDOR weaknesses across transaction gates.	-	15,000	15,000
Financial Transaction Tampering Aggressive assessment around the lending lifecycle, loan limits, credit checks, and disbursement gateway integrations.	-	15,000	15,000

Subtotal	60,000
Total (KES)	**60,000**

Payment Terms: Deposit Required
A mandatory deposit of **30,000 KES** is required to initiate the engagement and secure the assessment timeline.

Payment Methods

Account Name	**Arlington Studios**
Bank Account No.	**1339162997**
M-Pesa Till Number	**7003708**

TERMS OF ENGAGEMENT

1. **Payment:** A deposit of 30,000 will be paid before commencement of work; balance due Net-15 upon final report.
2. **Confidentiality:** Arlington will execute a mutual NDA prior to assessment initiation.
3. **Retesting:** Includes one complimentary verification retest cycle within 30 days of the report delivery.
